

AI Doctor Consultation Report

Date: 2025-07-21 22:20

Patient's Description:

Hi Doctor, what is the issue with my face? Please tell.

Doctor's Diagnosis:

With what I see, I think you have a severe case of acne on your face, which appears to be causing inflammation and possible scarring, I would suggest a good skincare routine and topical creams to reduce the acne. I would also advise you to maintain good hygiene, avoid picking at the acne, and consider consulting a dermatologist for further guidance and possible prescription medication to help clear up the condition.
